Ampang, Selangor

Position to apply : Software Developer/Software Engineer

SUMMARY

Enthusiastic Software Engineering graduate with hands-on experience in Full Stack Development (PHP, JavaScript, HTML) and a strong foundation in security engineering. Proficient in building scalable and efficient applications, with a strong foundation in agile development, software design and implementation. Experienced in enhancing system security through identity and access management tools like SailPoint and network management with Infoblox DDI. Adept at working in cross-functional teams, collaborating effectively and solving complex technical challenges. Passionate about applying my technical expertise to develop innovative software solutions and seeking a permanent role to contribute to impactful projects.
